

FOR IMMEDIATE RELEASE

Fraen Optical Components Division to Speak at Strategies in Light 2007

READING, MA - February 5, 2007 - Bob Householder, R&D Director, Fraen Corporation will be speaking at Workshop No. 4 **Design Principles for LED Lighting Systems** on Monday February 12 at 1pm.

Bob and his co-speakers will cover feasibility, design issues, and common design approaches for optics for HB LEDs.

Bob has 14 years of experience in the field of optics and holds degrees in optics from Rochester Institute of Technology and Tufts University. He has concentrated his career in laser and medical optics and LED illumination.

About Fraen

Whether it's standard optic products or the most sophisticated custom solutions Fraen Corp. (<http://www.fraensrl.com>) is committed to providing the highest quality and innovative solutions. From automotive lighted instrumentation pointers and fiber optic couplers and light pipes, to high-efficacy TIR collimators and high precision reflectors, Fraen develops products that manage and maximize light in ways never before achieved in the lighting industry. Fraen - maximizing light through innovation.
